

GPS Tracking Solutions

Fleet Management Solutions (FMS) with web interface helps in monitoring and managing the vehicles in real time. FMS uses GPS to identify locations and GPRS to communicate. This solution is useful for your logistics need for better utilization and monitoring.

About Us

We have extensive implementation expertise in GPS and GPRS based solution. It has proven record for different domains and different requirements.

Key Features

- Customizing Solution to suit your Requirements
- Range of hard ware equipment options
- Precise location with GPS speed
- Alerts for speed, route deviation and others
- Fuel Sensor
- Distance Travelled
- Geo- Fences, Geo Boundary
- Route Trips and Scheduling
- Various Reports
- Clear Location names
- Mail scheduler, SMS alerts

Key Benefits

- Better monitoring
- Improved customer service
- Better Vehicle utilization
- Reduces insurances cost
- Tracking of vehicle and Driver safety
- Reduces operating costs

Asset is being termed as a boon to the logistic and transport industry. It has helped many customers to track the logistic operations. Many organizations have adopted FMS as the Advances Technology tracking solution.

Transportation & Logistics

- 24/7 vehicle tracking
- Increases driver's efficiency
- Route Monitoring
- Effective Scheduling

Delivery & Courier

- Estimated time of delivery
- Delivery confirmation
- Route Monitoring

Car Rental & Taxis

- Automated dispatch of vehicle
- Monitoring pickups and drops
- Two way communication
- Fully integrated application

Mobile Tracking

- Business management.
- Track Drivers and know the vehicle Location.
- Elderly person Tracking/Child tracking
- For Tracking no extra cost

School

- Children safety and security
- Estimated time of arrival
- SMS alerts

Manufacturing & Constructions

- Ignition on/off status
- Fuel control Monitoring
- Project wise asset grouping
- History tracking

Distance Report

Vehicle No	Date	Distance(km)	Cumulative Total(km)
AP 02CR 6218	26/08/2013 12:00AM	91	91
